

Glenside Organic product range

Unrestricted use

Category	Product name	Description	Packaging
Animal Minerals	Seaquim® Elite	Size graded Seaweed meal: source of readily available animal minerals and vitamins	25Kg and Tote Bags
	Asco Marine Meal	Seaweed meal: Source of readily available animal minerals and vitamins	25Kg and Tote Bags
Seaquim® Tubs	Seaquim® Original	A feed tub incorporating the Seaweed meal. General all-purpose bucket.	25 and 100Kg tubs
	Seaquim® Plus Garlic	A feed tub incorporating the Seaweed Meal and garlic to help with control of flies.	25 and 100Kg tubs
Biologicals	Biagro® PhosN	A biological consortium of bacteria that mobilise phosphate and fix nitrogen in the soil. Biostatic so easy to apply.	1L
	Biagro® Grass	Mycorrhizal fungi inoculant for grass and other associated crops	1-25Kg
	Biagro® mP	A biological consortium of bacteria and Fungi. Applied to the soil or as a seed dressing.	1Kg
	Biagro® BrassiKa	Bacterial consortium aimed for improving plant growth habits in Brassica (OSR and field vegetables)	1kg
	Stubble Buster	Broad acre biological degrader of waster matter, straw, tree pruning's etc.	1kg
Bedding	Seabed 101	Calcium carbonate based animal bedding.	25Kg, Tote and bulk delivery

Restricted Use

Category	Product name	Description	Packaging
Soil Amendments	Calcified Plus®	Granulated lime with added seaweed and humates. pH buffering and improved grassland palatability Application rate: 200-500kg/Ha	25Kg-600Kg
	Pasture Plus	Granulated lime with added seaweed, humates and trace elements. pH buffering and improved grassland palatability and targeted trace element issues. Application rate: 250-300kg/Ha	25Kg-600Kg
	Calcified S	Granulated calcium sulphate with added seaweed and humates. Source of water soluble calcium and sulphur. Application rate: 200-500kg/Ha	25Kg-600Kg
	Glenphos 75	Granulated lime , rock potash and rock phosphate with added seaweed and humates. pH buffering , slow release P&K and background levels of trace elements. Application rate: 200-500kg/Ha	25Kg-600Kg
	Seagreen® K	Granulated Lime and rock potash with added seaweed and humates. pH buffering , slow release Ca, K and background levels of trace elements. Application rate: 200-500kg/Ha	25Kg-600Kg
	Highland Potash	Granulated rock potash with added seaweed and humates. pH buffering , slow release K and background levels of trace elements. Application rate: 200-500kg/Ha	25Kg-600Kg
GlenTrace	GT Boron	Granulated Boron. Slow release 10% Boron. Designed to correct soil boron deficiencies: application rate 10-20Kg/ha	25Kg-600Kg
Soil trace elements	GT Copper	Granulated Copper. Slow release copper. Designed to correct soil Copper deficiencies. Application rate 10Kg/ha	25Kg-600Kg
	GT Zinc	Granulated Zinc. Slow release zinc. Designed to correct soil Zinc deficiencies. Application rate 10-20Kg/ha:	25Kg-600Kg

	GTS2250	Granulated sulphur: 2250% So ₃ . Designed for slow released S throughout the growing season. Boost protein in crops. Application rate: 25-60kg/ha	25Kg-600Kg
	GT Grass	Granulated mixture of Boron, Copper, Zinc, manganese, calcium and humates. Slow release copper. Designed as an all-round trace element application to soils. Application rate 50Kg/ha	25Kg-600Kg
	GT Composite	Granulated mixture of Boron, Copper, Zinc, manganese, calcium and humates. Slow release copper. Designed as an all-round trace element application to soils. Application rate 50Kg/ha	25Kg-600Kg
Bio stimulants	Marinure®	Liquid plant stimulant. Boost roots and aids plants in periods of stress. Helps tillers and nutrient recover in cereals, increase vegetable yields. Application rate 2.5-5L/Ha	10L or 1000L IBC
	Mærit®	Super Concentrated Liquid plant stimulant. Boost roots and aids plants in periods of stress. Helps tillers and nutrient recover in cereals, increase vegetable yields. Application rate 1-5L/Ha	10L or 1000L IBC
	Mærit® +Fe	Super Concentrated Liquid plant stimulant with added Iron. Boost roots and meet iron deficiency in the crop. Will also green up grass and harden it before winter. Application rate 2.5-20L/Ha	10L or 1000L IBC
	Actiff®	Super Concentrated Liquid plant stimulant. Boost roots and aids plants in periods of stress. Helps tillers and nutrient recover in cereals, increase vegetable yields. Application rate 1-5L/Ha	10L or 1000L IBC
	Prostim® B	Super Concentrated Liquid plant stimulant. Boost roots and aids plants in periods of stress. Helps tillers and nutrient recover in cereals, increase vegetable yields. Application rate 1-5L/Ha	10L or 1000L IBC
