

# Biological Product Options

## Glenside also offers:

- Albrecht® Soil Surveys: the easy way to understand how and why your soils perform.
- The 2007 RASE silver medal winner OxyGenerator®: probably the best grassland aerator on the market.
- GlentraceGrass: the composite granule that supplies trace elements (Cu, Zn, Mn, Se, Iodine and Boron) to the soil and forage.
- Biagro®Grass: Biological treatment for grass seed: improves yield and quality.
- SlurriMorr®: unique biological treatment for slurries and manure.
- Seaquim®: Bucket range, a broad range of minerals and supplements in six unique formulations.

For over 30 years the Glenside Group has been at the forefront in working with Farmers to improve the use of Farm Resources and boost the natural productivity of crops and livestock.

## Bio-Humates™

Activators - Plant Activators

### Carbon N Bal™

- Food source for soil microbial communities
- Basis for mixing with biological product options
- Ideal carbon replacement source

### Humaar™ Soil

- Very stable mix of soil applied Humates
- Food source for soil microbial communities
- Basis for soil fertility

### Humaar Foliar™

- Very stable mix of Fulvic and Humic acids
- For foliar application
- Basis for natural plant health fertility
- Supporting healthy growth

## Biologicals

UK designed and produced

### PhosN™

- High presentation of free living Phosphate solubilising and Nitrogen fixing bacteria working together to produce phosphatesin in a plant available form

### Biagro MP™

- Extensive consortium of beneficial microbes balanced for UK soils working together to produce healthy soil environments

### Biagro Brassica™

- Extensive consortium of beneficial microbes, specially designed for brassica crops

### Biagro Grass™

- Highly active Endo Mychorizol Fungi

### Biagro™ Stubble Buster

- Concentrated soil fungi for organic matter decomposition of thatch

## Biostimulants

Stimulating - Plant Metabolism

### Maerit™

- Highly concentrated form of plant acceptable hormones, trace elements and amino acids

### Marinure™

- Flowable form of plant acceptable hormones, trace elements and amino acids

### Marriphite™

- Plant acceptable hormones, trace elements and amino acids combined with active phosphate

### Actiff™

- Plant acceptable hormones, trace elements and amino acids combined with energy boost

### Prostim™

- Plant acceptable hormones, trace elements and amino acids combined with high energy boost
